Module	Finance
ID	M03_EPC_Finance_UC 1
Use Case Name	Token Money Receipt & Finance Verification
Actor(s)	Finance Executive: Authorized user responsible for submitting Token Money Receipts. Finance Controller: Authorized user responsible for verifying Token Money Receipts. System: Handles validations, notifications, and audit logging.
Description	This use case enables Finance users to record, submit, and verify Token Money Receipts received from clients after agreement signing. The verified token receipt acts as a key control point for project initiation and ERP execution. The system enforces Fund-Driven Execution Control Whereby Procurement, Engineering, SCM, and Project Execution modules remain locked until Token Receipt is verified and Budget Available (M09) is approved.
Preconditions	• M02 Deal Closure & Handover is completed. • Project record exists in ERP. • Signed Agreement exists. • LOA/Agreement Status is Received/Signed. • User has Finance module access rights. • Token Amount Required is configured for the project. • Project is available in Token Money Receipt Dashboard.
Post conditions	Success Scenario • Token Receipt is submitted successfully. • Finance verifies the receipt. • Token Status becomes Verified. • Budget eligibility is evaluated. • ERP Unlock eligibility is evaluated based on Token Receipt Verification and M09 Budget Release & Financial Sanction status. • Audit logs are generated. Failure Scenario • Receipt submission fails due to validation errors. • Receipt verification is prevented until all verification checklist items are completed. • ERP Unlock Status remains Locked if M09 – Budget Release & Financial Sanction is not approved. • User must correct validation issues and resubmit the receipt.
Assumptions	1. Only authorized Finance users with appropriate role permissions can create, edit, submit and verify Token Money Receipts. 2. Project details, including Client Information, Agreement Details, Contract Value, Sales Owner, Token Amount Required, and LOA/Agreement Status, are already maintained in the Project Master and available for retrieval during Token Money Receipt processing from previous process stages (M01 and M02). 3. <i>Company Bank Account master data is preconfigured and available for selection during receipt entry.</i> 4. Supporting documents such as Client Payment Proof, Bank Credit Confirmation, and Receipt Copy are available with the Finance team before receipt submission.

- ## Main Flow

Token Money Receipt Dashboard

Track and manage token money receipts submitted by clients.

01-May-2025 → 31-May-2025 All

Header

- Greeting Message
- Logged-in User Name
- Current Day, Date & Time
- Token Money Receipt Dashboard (Page Title)
- User Profile Icon for accessing user account and profile-related options

Summary Cards

- Pending Receipts
- Submitted Receipts
- Verified Receipts along with Total Amount Verified

Search Bar: Allows searching using Project ID, Client Name and Agreement Number.

Filter by Receipt Date Range, LOA Status and Token Status.

The page displays a token receipt table containing the following columns:

Field	Description
Project ID	Unique project identifier
Client Name	Client name
Agreement No.	Agreement reference
Contract Value	Total project value
LOA Status	Agreement status
Token Amount Required	Required token amount
Token Amount Received	Received token amount
Receipt ID	Receipt identifier
Receipt Date	Receipt date
Token Status	Pending / Draft / Submitted / Verified
Budget Available (M09)	Budget availability status
ERP Unlock Status	Locked / Unlocked
Project Status Flag	Project execution status
Actions	Edit Draft / Submit Receipt / View Receipt

Step 2: User can search for a specific receipt using the Search field and filter receipts using Receipt Date, LOA Status and Token Status.

Upon clicking Apply, system displays all records matching selected criteria.

Upon clicking Reset, system clears all filters and restores default records.

If no records are available System displays: "No token receipts available."

The receipt list refreshes dynamically based on selected search and filter criteria.

Step 3: User clicks the Action Menu (:) against the selected project and selects Submit Receipt.

The system performs the following validations:

- Project must have a valid Agreement Number.
- LOA Status must be Received.
- Token Receipt should not already be in Verified status.
- User must have permission to submit token receipts.

If validation passes, system opens the Token Receipt Entry Screen.

Token Receipt Entry

Finance > Token Money Receipt > Token Receipt Entry

Enter token money receipt details and upload supporting documents.

1. Project Information (Read Only)

Project ID
PRJ-001

Client Name
ABC Industries

Capacity
2 MW

Location
Gujarat

Agreement Number
AGR-1001

Agreement Status
Signed

Sales Owner
R. Sharma

Contract Value
₹2,50,00,000

Token Amount Required
₹1,00,000

2. Receipt Details

Receipt ID (Auto)
Auto Generated on Save

Receipt Date *
15-May-2025

Amount Received (₹) *
1,00,000

Payment Mode *

Project Information Section

The system automatically displays project information retrieved from Project Master.

Field	Description
Project ID	Unique project identifier
Client Name	Client name
Capacity	Plant capacity
Location	Plant location
Agreement Number	Agreement reference number
Agreement Status	Current agreement status
Sales Owner	Assigned sales owner
Contract Value	Total contract value
Token Amount Required	Required token amount

All project information fields are displayed in read-only mode.

Step 4: User enters token receipt information in the Receipt Details section.

Field	Description	Mandatory
Receipt ID	Auto-generated upon Save Receipt	No
Receipt Date	Date of receipt	Yes
Amount Received	Amount received from client	Yes
Payment Mode	NEFT / RTGS / IMPS / Cheque / Other	Yes
Transaction Reference	Transaction reference number	Yes
Bank Name	Company bank name	Yes

Account Number	Company bank account number	Yes
Bank Reference / UTR No.	UTR or bank reference number	Yes
Remarks	Additional comments	No

Validation: Amount Received must be equal to or greater than Token Amount Required.

Error Messages

1. "Receipt Date is required."
2. "Amount Received is required."
3. "Payment Mode is required."
4. "Transaction Reference is required."
5. "Bank Name is required."
6. "Account Number is required."
7. "Bank Reference / UTR Number is required."
8. "Amount received must be equal to or greater than Token Amount Required."

Step 5: User uploads supporting documents in the Document Upload section.

The section contains the following mandatory documents:

Document	Mandatory
Client Payment Proof	Yes
Bank Credit confirmation	Yes
Receipt Copy	Yes

Supported File Formats: PDF, JPG, PNG

Maximum File Size: 10 MB

Validation: File type must be valid and size not exceed maximum limit.

Error Messages

- "Client Payment Proof is mandatory."
- "Bank Credit Confirmation is mandatory."
- "Receipt Copy is mandatory."
- "Invalid file format."
- "File size exceeds the maximum allowed limit."

Step 6: User clicks the Save as Draft button.

Before saving draft, system performs the following validations:

Validation

- Project information must exist.
- At least one Receipt Detail field should be entered OR
- At least one document should be uploaded.

	If validation passes, System saves entered receipt information as Draft and updates Token Status = Draft. Displays: "Receipt draft saved successfully." Note: ERP Unlock Status remains Locked and Draft receipts are not routed for Finance Verification. Step 7: User identifies records having Token Status = Draft from the dashboard and clicks Action Menu (:) → Edit Draft. System opens Token Receipt Entry screen. System loads previously saved draft information. User can: ▪ Modify details ▪ Add information ▪ Remove information ▪ Upload additional documents User may perform either of the following actions: • Save as Draft • Submit Receipt for Finance Verification Step 8: User clicks Save Receipt and before submission, system performs the following validations: ▪ All mandatory receipt details must be completed. ▪ Amount Received must be equal to or greater than Token Amount Required. ▪ All mandatory documents must be uploaded. ▪ Duplicate UTR Number should not exist. ▪ Duplicate Receipt should not exist. If validation passes, system performs: ▪ Generates Receipt ID if not already generated. ▪ Updates Token Status = Submitted. ▪ Saves receipt details. ▪ Saves supporting documents. ▪ Routes receipt to Finance Verification Queue. ▪ Creates audit log entry. ▪ Sends notification to Finance user. Displays: "Receipt submitted successfully and routed for finance verification."
--	--

Step 9: User is redirected back to Token Money Receipt Dashboard and system updates the record as follows:

Field	Updated Value
Receipt ID	Auto-generated Receipt ID
Token Status	Submitted
ERP Unlock Status	Locked
Project Status Flag	Pending Verification

System automatically updates Submitted Receipts card count, Dashboard listing and audit history.

Finance Verification Flow

Step 10: Finance Controller logs into the system using valid credentials and navigates to Finance → Token Money Receipt Verification from the sidebar menu.

System performs the following validations:

- Token Status must be Submitted.
- Receipt must not already be Verified.
- User must have Finance Verification permission.

User identifies records having Token Status = Submitted and selects Verify Receipt

System opens Finance Verification Panel.

Finance Verification Panel

Finance > Token Money Receipt > Finance Verification

Verify token money receipt, validate supporting documents and confirm verification.

Fund-Driven Execution Control: ERP modules (Procurement, Engineering, SCM, Project Execution) will remain LOCKED until Token Receipt is Verified and Budget Available (MO9) is TRUE.

1. Project & Receipt Summary

Project ID	Client Name	Agreement No.	Agreement Status	Contract Value

Project & Receipt Summary (Read Only)

System displays: Project ID, Client Name, Agreement No., Agreement Status, Contract Value, Token Amount Required, Token Amount Received, Receipt ID, Receipt Date, Transaction Reference / UTR No., Payment Mode, Bank Name, Account No. and Bank Reference / UTR No.

Step 11: Finance user reviews uploaded documents.

Documents Available

- Client Payment Proof
- Bank Credit Confirmation
- Receipt Copy

Finance user can View and Download documents using the respective action buttons. Documents open in a separate viewer window.

Step 12: Finance user reviews Finance Verification Checklist.

The system displays the following verification checkpoints:

Check Point	What to Verify
Amount matches required token amount	Amount equals or exceeds requirement
UTR verified	Transaction matches bank details
Bank credit confirmation verified	Amount credited to company account
Documents valid and readable	Uploaded documents are valid
No duplicate receipt exists	Receipt not already submitted/verified

Finance user reviews and verifies each checkpoint by selecting the corresponding verification checkbox.

Finance user may enter comments in the **Finance Remarks** field to record verification comments, observations, or clarification notes.

Validation: All verification checklist items must be completed before approval.

Error Message: "All verification checklist items must be completed before approval."

Step 13: Finance user clicks the Verify Receipt button.

Before verification, the system performs the following validations:

- All verification checklist items must be completed.
- Amount Received must be equal to or greater than the Token Amount Required.
- All mandatory supporting documents must be available.
- No duplicate receipt record exists in the system.

If validation passes, the system performs the following actions:

	▪ Updates Token Status to Verified. ▪ Saves Finance verification details and remarks (if provided). ▪ Records verification activity in the audit log. ▪ Displays the confirmation message: "Receipt verified successfully." After successful verification, the system automatically evaluates the ERP Unlock conditions. ERP Unlock Evaluation The system evaluates the following conditions: A. Token Status = Verified B. Budget Available (M09 – Budget Release & Financial Sanction) = Yes / Approved M09 status is retrieved automatically from the Budget Release & Financial Sanction module. Finance users cannot modify the M09 status from the Token Money Receipt module. If Both Conditions are satisfied system performs the following actions: ▪ Updates ERP Unlock Status to Unlocked. ▪ Updates Project Status Flag to Active. ▪ Enables Procurement Module access. ▪ Enables Engineering Module access. ▪ Enables SCM Module access. ▪ Enables Project Execution Module access. ▪ Records ERP Unlock activity in the audit log. Displays the confirmation message: "Receipt verified successfully. ERP modules have been unlocked." If M09 Budget Release & Financial Sanction Is Not Approved The system performs the following actions: ▪ Keeps ERP Unlock Status as Locked. ▪ Maintains Token Status as Verified. ▪ Updates Project Status Flag to Pending Budget Release & Financial Sanction. ▪ Records the status update in the audit log. Displays the confirmation message: "Receipt verified successfully. ERP modules remain locked until M09 (Budget Release & Financial Sanction) becomes Yes/Approved." Step 14: After Finance Verification, the system performs the following actions: ▪ Updates receipt status in the database. ▪ Updates dashboard summary card counts.
--	---

	▪ Refreshes dashboard records. ▪ Updates ERP Unlock Status. ▪ Updates Project Status Flag. ▪ Updates and maintains audit log containing: ○ User ID ○ Receipt ID ○ Action Performed ○ Finance Remarks (if provided) ○ Timestamp ▪ Maintains complete verification history for future audit and compliance purposes.
Alternative Flows	AF-01: No Records Available: If no Token Money Receipt records are available in the system, the system displays the message "No token receipts available." AF-02: Duplicate Receipt Reference: If a duplicate Transaction Reference Number, UTR Number, or Receipt record already exists, the system displays an appropriate error message and prevents receipt submission. AF-03: Amount Less Than Required: If the Amount Received is less than the Token Amount Required, the system displays the message "Amount received must be equal to or greater than Token Amount Required." and prevents receipt submission until the amount is corrected. AF-04: Missing Mandatory Documents: If mandatory supporting documents are not uploaded, the system displays the appropriate validation messages and prevents receipt submission until all required documents are uploaded. AF-05: Save as Draft: If the user exits before submitting the receipt, the receipt can be saved as a Draft and edited later. AF-06: Finance Verification Checklist Incomplete: If all Finance Verification Checklist items are not completed, the system displays the message "All verification checklist items must be completed before approval." and prevents receipt verification until all checklist items are verified. AF-07: M09 Budget Release & Financial Sanction Not Approved: If Token Money Receipt is verified but M09 – Budget Release & Financial Sanction is not approved, the system keeps the ERP Unlock Status as Locked and updates the Project Status Flag to Pending Budget Release & Financial Sanction until budget approval is completed. AF-08: System or Network Error: If a system or network error occurs during receipt submission or verification, the system displays an error message and the transaction is not processed until the user retries the operation.
